

The Worship Design Commission oversees all aspects of the worship experience, taking into account the diverse needs of our faith community. This includes planning worship themes with the pastors, reviewing the content and order of worship, planning and implementing special services, making arrangements for the serving of the Lord's Supper, coordinating appropriate Sanctuary decorations, working with the Communications Commission to advertise our worship offerings to the community, and overseeing the Usher Ministry.

This Commission, whose membership includes the Director of Music Ministry, oversees the musical life of our congregation, including service music, the Adult Choir, the Adult and Youth Bell Choirs, all special music (instrumental as well as choral), and the Concert Series.

The Commission also partners with the Tech Team, including the Streaming Media Manager position, which is responsible for planning, recording, editing, and disseminating the livestream and recordings of the weekly services.

The Worship Design Commission meets once a month, generally on the second Tuesday evening.
